

## **Three Tests Given By Sholiach Moshe Yoseph Koniuchowsky 3/10/18**

BERESHEETH-GENESIS CH. 1 14-16 is our text. THE HEAVENLY WITNESSES OF YHWH'S TIME FOR DAYS, SEASONS, SHABBATS AND FEASTS! The Sun, Moon and stars are 3 witnesses to YHWH's division of time! The moon when used properly can confirm the light source it represents. The stars are collectively the night light or the LESSER light.

Let us quickly examine the 3 key factors to discern when the Year Turns & see how the so called Spring Equinox and Spring Equilux compare and which one meets the required criteria.

-The Sun Test- The sun must rise and pass due east-west over the celestial equator, when the earth is at 0 degrees relative to the sun. Equinox passes the test. At Equilux the sun is still about 6 degrees south of the celestial equator and has not crossed it. The GREAT SIGN TEST is a cosmic sign & event and is failed by the so-called Equilux but passed by the Vernal Equinox. You will find the same results for the Fall Turn of The Year. Rest assured Enoch did not measure nano-seconds of refracted light in Jerusalem, a non-Israelite place during Enoch's time. The heavens taught him astronomy. He read shadows!

-The Stars Test- The sun rises and sets in the constellation of Pisces for about another 500 years, starting March 12th for about 38 days from March 12-April 18th. Both so-called Equilux and Equinox pass this test nicely!

-The Moon Test- The moon lags behind the sun exactly as Enoch says, 10, days annually. The Zadokites used it to CONFIRM the 2 turns of the year and both solstices, as well as to confirm the 24 week order of the Millennial Temple priests, based on 1 Chronicles Ch.24.

This year, March 1st 2018 is 20 days before The Spring Equinox in the third year of a 3 year lunar cycle. On March 20th, In 2019, the first year of the new 3 year cycle, the full moon will appear exactly on the afternoon of the Spring Equinox, as well as exactly 30 days before and after it! The cycle repeats itself every 4th year so we can know which year it is!

The phases of the full moon monthly confirm the days of the week, as they always fall on the same day in the modern week, as they did at the time of the Messiah. So for example in year one of a 3 year lunar cycle, the full moon of Aviv 1 is always Day 4 of week one and it always falls on our modern Wednesday every 3rd year. The second year for example has the full moon of Aviv fall on Day 2 of the 4th week of Aviv, and it always comes out on our Monday matching the ancient day 2! The full moon phase shows that the 7 day week has never changed! Meaning day 7 then is called Saturday today! SO there is a key purpose for the moon after all. These were done by calculations NOT OBSERVATIONS, THE SIN OF THE WATCHERS.

If Equilux New Year is March 16th in Jerusalem as some allege, the full moon would have to occur only 16 days rather than the required 20 in 2018 [March 1st full moon-March 16th] before the supposed equal day and night, DIRECTLY CONTRADICTING the priestly records at Qumran. The Spring & Fall Equinoxes pass the moon test but the Equilux fails the moon confirmation test miserably!

**YEAR #1 12/02 (30 days before Abib 1) 01/01 & 01/30 (30 days after Aviv 1)**

**YEAR #2 12/22 (10 days before Abib 1) 01/20 (20 days after Aviv 1)**

**YEAR #3 12/12 (20 days before Abib 1) 01/10 (10 days after Aviv 1)**

-Summary-The lie called The Equilux in Jerusalem on March 16th fails both the primary sun dial test, as well as the confirming moon phase test, as well as the subsequent priestly order test. The Vernal & Autumnal Turns of the Year pass all 3 Torah tests, with clarity and flying colors, pun intended! View all 3 signs for YOURSELF so you are no longer duped by data but enlightened with DAAT-The Knowledge from YHUH Almighty!
